# Medicaid Pharmacy News

Dear Pharmacies:

January 22, 2021

## **JANUARY 2021 UPDATES**

### **COVID-19 VACCINE UPDATES**

Wyoming Medicaid is working to complete and thoroughly test the programming that will allow NCPDP D.0 compliant claims for COVID-19 vaccines to process through the pharmacy POS system and will release detailed billing instructions and information when this programming is implemented.

To be adequately prepared and ensure smooth claims processing, any **pharmacists planning to be the prescribing provider on vaccine claims must be enrolled with Wyoming Medicaid**. Pharmacists who are not yet enrolled with Wyoming Medicaid are encouraged to start the process by visiting <http://wymedicaid.acs-inc.com/wy/general/providerEnrollmentHome.do>

Further updates will be distributed soon, but please call the Change Healthcare Pharmacy Help Desk at 877-209-1264 with any questions.

### **DOSE LIMITATION CHART UPDATES**

**(Effective 01/01/2021)**

- Bupirone has been updated per FDA recommendations to a limit of 45mg per day for clients younger than 18 years of age, and 90mg per day for clients 18 years of age and older.
- Guanfacine has been updated to a limit of 4mg per day for clients 6 – 12 years of age, and 7mg per day for clients 13 – 17 years of age.
